

HOME CARE VISIT REPORT

FICTIONAL SAMPLE DOCUMENT — created for software testing. Not issued by any hospital, clinic or pharmacy. No real patient is represented. Not medical advice.

Agency Example Home Nursing Services, Doha (fictional)
Client Mr. Ahmed Al-Karim (fictional)
Visit 20 December 2026, 08:00–10:00
Nurse RN Grace Mendoza (fictional)
Visit type Post-discharge nursing visit #2

Observations

Time	BP	Pulse	SpO2	Temp	Weight	Glucose (pre-breakfast)
08:15	128/76	74	96%	36.9 °C	71.2 kg	6.4 mmol/L

Chest clear on auscultation, cough resolving. Alert, oriented to person and place, not to date (baseline). Skin intact; heels checked. Bowels opened yesterday. Appetite fair — ate half of breakfast, took supplement drink.

Medications

Morning medications given from dosette at 08:30: Sertraline 50 mg, Memantine 10 mg, Bisoprolol 2.5 mg, Furosemide 40 mg, Metformin 500 mg, Amoxicillin-clavulanate 625 mg (day 10 of course — last dose due tomorrow evening 21 Dec). Dosette box for next week filled by family; checked and correct. Note: Melatonin box still in the cupboard although marked STOPPED on discharge letter — advised family to return it to pharmacy.

Actions / handover

- Wound/skin: none. Falls: none since discharge. Fall-risk remains high; frame in use.
- Physio exercises done with client today (sit-to-stand ×5, marching 1 min).
- Family to book repeat chest X-ray (walk-in from 4 Jan) — reminded.
- Next nursing visit: Wednesday 23 December 2026, 08:00.
- Escalate to GP/clinic if temperature ≥ 38 °C, new confusion, or breathlessness.

RN Grace Mendoza (fictional) — Registration no. N-000000 (fictional)
